

ACOUSTIC ROOM DIVIDERS

DIVIDE THE SPACE, NOT THE STYLE

Bring flexibility, privacy, and acoustic control into any space, without building permanent walls.

Osonic's room dividers are designed to bring flexibility and calm to open spaces. Crafted by our in-house designers, they combine form and function — visually breaking up large interiors while reducing noise transfer between zones. Whether you're shaping collaborative hubs in offices or cozy corners in hospitality spaces, these dividers add architectural rhythm and acoustic comfort without the need for walls.

Because sometimes all a space needs is a gentle "shhh" in the middle.

Features

Panel Sizes

Available in standard 4'x8' or 4'x9' panels for versatile ceiling layouts.

Thickness Options

Offered in 12mm and 18mm to meet varied acoustic and design requirements.

Sustainable Material

Crafted from 60% recycled PET felt for an eco-conscious acoustic solution.

Edge Profiles

Available in soft or sharp edge finishes to complement your aesthetic.

Simple Installation

Easily suspended from ceilings to create quiet, private acoustic zones.

Design Variety

Available in a wide range of patterns and styles for customized interiors.

Adjustable Mounting

Features a unique channel system with adjustable fixing positions for flexible installation.

Fire Rating

Complies with fire safety standards.

Moisture Resistant

Unaffected by moisture, mold, or mildew, ideal for long-term durability.

Non-Toxic Composition

Contains no formaldehyde binders and is 100% VOC-free for safe indoor air quality.
